EXPERIENCES

Stellar Cyber, a Series C cybersecurity company | San Jose, CA Jun - Aug 2024

UX Design Intern, invited by mentor and manager to return as summer intern

- Led the design of UI components for a new design system, including buttons, input fields, chips, and typography, enhancing cross-platform consistency.
- Independently designed and launched 20+ icons for various data sources for GraphML, a threat detection and response platform, collaborating with engineers to ensure seamless implementation.
- Drove the research and analysis for the Data Connector user flow, influencing design strategy
- Delivered 10+ presentations to cross-functional teams, honing public speaking and iterative design skills.

Studio Salt | Hayward, CA May - Oct 2023

UX Design Intern

- Collaborated with senior designers to create logos, brand guidelines, and app designs for Web3 startups.
- Designed and launched the logo and brand guide for Sancus Ventures (sancusvc.com)
- Contributed to the design for Puffer, a high-profile new Ethereum staking app (puffer.fi), surveyed 30+ participants, drove 2 user-testing interviews, and created lo-fi and hi-fi wireframes for staking flows

Boston University FORGE Design Studios | Cupertino, CA (Remote) Jun - Nov 2022

Design Intern, retained as a paid intern in the Fall by the client Zero Cash, an Algerian Fintech

- Selected as the only Freshman for a student-led program
- Team presented 6+ logo design concepts. One of my designs was chosen by the client as the official logo
- Designed wireframes and prototypes for key features, including onboarding and scheduled payment flows, later hired to design a QR-based restaurant menu system.
